

How We've Made A Difference

April 18, 2009

Women's Expo 2009

The 3rd annual Gulf Coast Women's Expo presented by Baptist Health Care was held on April 17 and 18 at Pensacola Junior College. The Women's Expo provides Baptist Health Care the opportunity to improve the quality in our community. Free health screenings were provided to the 2,000 attendees and included 150 blood glucose screenings, 285 osteoporosis heel scans, 93 heart risk assessments, 138 stroke risk assessments with blood pressure and total cholesterol checks and 150 body fat analysis. Speakers from Baptist Health Care also shared information on the WSRE stage that included "Don't Make Me Laugh: What You Should Know about Incontinence" and "Focusing on Strengths: Improving Yourself and Your Relationships". A free vascular screening and cardiac calcium screening was presented to the winner of our grand prize drawing.

A special thank you to our Baptist Health Care volunteers. Over 40 employees worked at Women's Expo to ensure the two day event was a success.
